

Installation Instructions

I. Package Checklist

1. Wall light fixture × 1
2. Mounting plate × 1
3. Expansion screw accessory pack × 1

II. Installation Steps

1. Marking & Drilling:

- Place the mounting plate against the wall and mark the hole positions with a pencil.
- Use an electric drill with a 6 mm drill bit to drill holes at the marked positions, approximately 40 mm deep.
- Insert the wall anchors, then secure the mounting plate firmly to the wall with self-tapping screws.

2. Electrical Connection:

- Feed the power wires from the wall through the hole in the fixture base.
- Connect the wires: Live wire (L - red/brown) to live wire; Neutral wire (N - blue) to neutral wire.
- Wrap the connections firmly with insulating tape or use wire connectors, ensuring that no bare copper wire is exposed.

3. Fixing the Fixture:

- Align the fixture base with the screw holes on the mounting plate.
- Tighten the decorative nuts, or insert the long screws through the base to lock it onto the mounting plate, ensuring the fixture is stable and does not wobble.
