

Apex Wall Sconce

AESTHOME

SPECIFICATION SHEET

DESCRIPTION

A sculptural study in light and geometry, the Apex Wall Sconce is formed from panels of natural alabaster arranged into a striking inverted pyramid. Its sharply defined silhouette brings an architectural presence to the wall, while subtle variations in the stone soften the design with organic depth and character. When illuminated, warm light filters gently through the translucent alabaster, revealing its delicate veining and creating a calm, atmospheric glow. Contrasting dark metal fasteners add a refined graphic detail, highlighting the fixture’s precise construction and balanced proportions.

Part of the Apex Series, this wall sconce pairs beautifully with the Apex Pendant Light, creating a cohesive lighting scheme across hallways, bedrooms, living areas, and other refined interiors. As each piece is crafted from natural stone, variations in colour, texture, and veining make every fixture unique.

SPECIFICATION DETAILS

*For custom options, consult factory for details

- SKU:58205574889856
- Material: Alabaster, Carbon steel.
- Light source: LED bulb or Edison bulb.
- Light source base type: G9.
- Size: Dia 34cm x H 19cm / Ø 13.4” x H 7.5”
- Kelvin range: Warm Light.
- Voltage: AC 110-240V.
- Mounting: Wall.
- IP Rating: IP20. Suitable for dry indoor locations only; not waterproof.
- Environment: Indoor.
- Body Finishes: White, Black.
- Control: Compatible with common wall switches (not included).
- Regional Compatibility: Suitable for use in North America, Europe, and Australia.
