

Silent Vein Wall Lamp

AESTHOME

SPECIFICATION SHEET

DESCRIPTION

Sculpted from natural alabaster, the Silent Vein Wall Lamp features a softly fluted surface traced with delicate mineral veining. Once illuminated, warm light passes gently through the translucent stone, revealing its organic character and creating a serene, atmospheric glow.

Its slender vertical form draws inspiration from classical architectural columns, while the unique variations in the alabaster ensure that every lamp is one of a kind. Understated yet quietly striking, Silent Vein brings natural depth and a sense of tranquillity to hallways, bedrooms, and sophisticated living spaces.

A refined expression of light, stillness, and the timeless beauty of natural stone.

SPECIFICATION DETAILS
